- Asbestos Management / Abatement
- Environmental Engineering
- Environmental Impact Assessment Services
- Bioremediation
- Hascom Implementation
- Waste Water Treatment

E. ENGINEERING WORKS AND SERVICES (DESIGN-CONSTRUCTION)

- Building and Civil Engineering Services
- Structural Steel Works and Erections
- Mechanical / Electrical Engineering Works (Onshore and Offshore)

F. INSPECTION SERVICES

- Vessel and Exchanger Fabrication
- Mechanical Equipment
- Pipeline Installation - water pumps, volume and pressure units, hoses, marine dredging, zip pump and blasters.

OUR SERVICES

PHILOSOPHY CORPORATE ENGINEERING QUALITY

The organization aim of EMINAD Limited is to provide construction/ consultancy services of a high quality and to maintain same for the consolidation of expertise and excellence. The company's desire is to provide appropriate, effective and efficient services to Clients while keeping to the tenets of the profession and all the relevant laws of the Federal Republic of Nigeria and / or the Client's country.

Every project being undertaken by the firm comes directly under the preview of a partner who usually possesses specialists skills, required for the particular project as the Project Manager. It is the philosophy of the company to raise a Project quality Group in the execution of its projects. Quality thrives on the effective project coordination as implemented by the Project Quality Group, which consists of the Partners of our firm. This is aimed at providing outstanding construction / consultancy services with first class efficiency.

The responsibility of quality achievement falls upon each of our highly qualified and professional personnel. This is because quality, performance, reliability and safety are all essential to the continued success and prosperity or our company and the well being of the Clients which we serve.

QUALITY ASSURANCE

Quality Assurance (QA) is placed on all project activities particularly professional expertise, which is fundamental to long term project quality. We give top priority to human reliability because the quality of services provided by our firm is closely related to and determined by human performance.

In our construction Feasibility Studies and Technical Assistance Projects, the core of the quality assurance is a combination of detailed internal and external monitoring and evaluation on projects, which are aimed at identifying and producing the needs, requirements and possibilities to the taste of the Client.

We implement this programme in accordance with the provisions of International Organization for Standardization (ISO) Code 9001: 1994: QUALITY SYSTEMS – MODEL FOR QUALITY ASSURANCE. This is carried out to enable continuous improvement in quality and fitness for purpose in all the firm's undertakings. Moreover our quality goal is doing the right thing and doing it right the first time, on time, so to meet Client's expectations and needs. The firm has also developed an in house quality system include; Project Quality Plan, Company Procedures Manual, Quality Assurance Functions, Quality Control, Design Review, Document Control and Quality Improvement / Feedback.

CRITERIA FOR SELECTION AND COMPOSITION FOR PROJECT TEAMS

The selection and composition of our project team are based on the following criteria:

- i. The need for the effective utilization of qualified and experience professionals
- ii. The need to provide adequate technical and logistic support to fulfill the specific task within the time allocated to it.
- iii. The need to create a close working relationship between the companies's Team and the Project Implementation unit of the Client's Organization.
- iv. The need to provide quality service based on the requirement of Quality Assurance (QA) in engineering service.
- v. The Interdependencies of the tasks involved and their nature.
- vi. The utilization of team members who have a working understanding of the project area.

PERSONNEL

In order to effectively meet the needs of our clients, it is the cornerstone of our staffing policy to employ and retain only highly qualified, experienced, field tested and IT compliant professionals. A list of the professional staff is included in this document.
